SUMMARY

Motivated Computer Science undergraduate specializing in Data Science, with strong foundations in Python, data analysis, machine learning, and database systems.

Hands-on experience through academic projects, professional certifications, and virtual job simulations involving EDA, data visualization, and predictive modeling.

Eager to contribute to data-driven roles in analytics and datascience while continuously advancing my skills in machine learning and AI.

TECHNICAL SKILLS

Programming & Query Languages: Python · C Programming · SQL

Python Libraries & Tools: Pandas · NumPy · Matplotlib · Seaborn · Scikit-learn

Data Science & Analytics: Exploratory Data Analysis (EDA) · Data Cleaning & Preprocessing · Feature Engineering · Supervised Machine Learning (Regression & Classification) · Model Evaluation

Core Computer Science: Object-Oriented Programming (OOP) · DBMS · Basic Data Structures & Algorithms

Emerging Technologies: Generative AI (Prompt Engineering, Basics of Large Language Models)

PROJECT EXPERIENCE

Zomato Data Analysis (EDA): Performed EDA to uncover insights on restaurant pricing, ratings, locations, and customer preferences.

Cleaned and preprocessed datasets using Pandas and NumPy to ensure data consistency.

Built meaningful visualizations using Matplotlib and Seaborn to communicate insights effectively.

Identified factors influencing restaurant ratings and online delivery trends.

E-commerce Sales Analysis – Amazon

Analyzed Amazon sales data to study product performance, revenue trends, and customer behavior.

Visualized insights to identify high-performing product categories and seasonal demand patterns.

Student Performance Prediction (Machine Learning)

Built a supervised ML model to predict student academic performance based on demographic and academic features.

Applied data preprocessing, feature selection, and train-test split techniques.

Implemented models using Scikit-learn and evaluated performance using accuracy metrics.

CERTIFICATIONS & VIRTUAL EXPERIENCE

Data Science Certification – Internshala Trainings

[Certificate](#)

Issued: March 2025 Credential ID: 7gltfcapf29

Gained hands-on experience in Python, data analysis, statistics, and machine learning concepts.

Worked on real-world datasets involving EDA, data preprocessing, and visualization.

Deloitte – Data Analytics Virtual Job Simulation

[Certificate](#)

Issued: July 2025 Credential ID: WBvgGGaQwZjXiE33A

Completed tasks involving data cleaning, analysis, and visualization for business scenarios.

Developed an understanding of how analytics is applied in consulting and enterprise environments.

BCG X – Data Science Virtual Job Simulation

[Certificate](#)

Issued: August 2025 Credential ID: Lvtx3GR5WBg6xWAcM

Analyzed business data to generate data-driven insights for strategic decision-making.

Practiced framing analytical problems, interpreting results, and communicating insights clearly.

EDUCATION

Galgotias University | **B.Sc (Hons.) – CS(Data Science)** | September 2024 – Present

SOFT SKILLS

Analytical Thinking · Problem Solving · Continuous Learning · Time Management · Team Collaboration · Communication
